

PRINTEC[®] 204 FUSION

The Printec[®] 204 Fusion UV blanket utilizes a 100% EDPM surface compound. Through an innovative curing and grinding process coupled with an enhanced compressible layer, this blanket offers a number of advantages in UV applications. The harder surface of EDPM enhances ink transfer and allows the use of lighter weight stocks. The modified compressible layer provides excellent smash resistance. The Printec[®] 204 Fusion is highly compatible with UV inks and washes and resists embossing and swelling. It provides excellent results when running metallic inks. It can be used in both sheetfed and web UV applications and is compatible with a wide range of hybrid inks.

Benefits:

- Utilizing EPDM ensures longer blanket life
- Less blanket changing due to swelling and embossing
- Reduced blanket stretching on press
- Extremely smash resistant
- Reduction in overall blanket usage
- Excellent print quality
- Low stretch
- Longer life

PHYSICAL CHARACTERISTICS

- Color: Purple Wine
- Thickness: 1.96 mm +/- 0.02 mm
- Roughness: 1.0 µRA
- Hardness: 76 Shore A
- Elongation: 2% Max
- Compressibility: 115 +/- 25 N/cm²
- Surface: Buffed

Features:

- Contains an EPDM surface rubber compound
- Resists swelling and embossing
- Incorporates new fabric technologies
- Manufactured with an enhanced compressible layer
